### ***Claim Rejections - 35 USC § 101***

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-10,12-13 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Claim 1 sets forth that the flexible material contacts and conforms to the skin region thereby including the patient as part of the claimed invention. In claim 5, the assembly is set forth as being worn on the thorax thereby also including the patient as part of the claimed invention. The inclusion of the patient as part of the claimed invention renders the claims non-statutory.

### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Art Unit: 3737

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-10,12,13,18-27 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-10,15-23 of copending Application No. 09/935,908. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims in application no. '908 are directed to an applicator which would have been obvious to use in a system for applying the signals to operate the applicator. The applicators set forth in both applications include substantially the same structure.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claims 1-10,12,13,18-27 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 5-8,13,18-20,22-23 of copending Application No. 10/202,494. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims in application no. '494 are directed to an applicator which would have been obvious to use in a system for applying the signals to operate the applicator. The applicators set forth in both applications include substantially the same structure. The use of a hydrophilic material to shed the air bubbles as well as the materials used to support the acoustic stack are old and well known in the art based upon their suitability for intended use and would therefore have been obvious.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

### ***Response to Arguments***

Applicant's arguments with respect to claims 1-10,12,13,18-27 have been considered but are moot in view of the new ground(s) of rejection.
